

Improved patient access for high-performing medical groups

Healthcare organizations are moving towards **integrated patient access** to battle the looming staff shortages, increasing industry costs, and revenue loss from patient churn and no-shows.

Healee helps you easily manage complex team schedules, eliminate a multitude of disconnected tools and offer patients a simplified experience.

With Healee, healthcare teams attract, engage and retain more patients, while simplifying operations, balancing workloads, and growing profitability.

How next-gen patient access helps you grow

Optimized provider capacity utilization

Balance patient flow and prevent scheduling bottlenecks such as underbooking, overbooking, or mismatches at multi-member teams, facilities and time zones

Accelerated new patient acquisition and retention

Expand scheduling and communication channels, offer proactive and personalized attention by the provider team, and easy access to patient data at the point of care

Easier patient handling and navigation

Streamline processes covering patient eligibility, patient-provider matching, automated patient intake, routing and referrals, chronic conditions care pathways

Increased patient engagement

Online appointments

80%

Increase of bookings by year 3
